

Implementation of 1A simpleERP information system in Progress IV Management GmbH

[Progress IV Management GmbH](#) Company organizes an investment, innovation, scientific and tourist forums and conferences encouraging a direct links between CIS, Austrian and European businessmen.

In 2014 the company management decided to implement an integrated information system automating our accounting and managerial tasks. We have chosen a solution 1A simpleERP, developed by [1A Softwar](#) using [1C:Enterprise platform](#) and based on [1C:AccountingSuite](#) application.

Product translation and customization was performed by [1A Software](#) specialists with direct participation of [1C LLC](#) experts, who provided them with [Extended TechSupport](#) service. The implementation project involved functional improvements according to our requirements (including print form adaptation) and our staff training.

After using the system for a while we found it meeting all our requirements and would like to express our gratitude to 1A Software specialists and 1C LLC experts for the job done. We look forward to seeing further improvements of the system functionality down the road.
